## DETAILED ACTION

### *Election/Restrictions*

1. Applicant's election with traverse of Group II, claims 6-9 in the reply filed on July 15, 2005 is acknowledged. The traversal is on the grounds that this application is a CIP of 09/704, 651 which in turn is a CIP of 08/983,591 and hence it is the Applicant's position that the claims should be examined together. However, the Examiner disagrees. The basis of a proper restriction has been provided in the Requirement for Restriction mailed on June 13, 2005 and hence the requirement is made FINAL.

**Claims 1-9 are pending of which 6-9 are under consideration.**

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 6-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Snow (US 4,363,841).

Snow discloses a laminated packaging material comprising an outermost layer of polyester or polypropylene (***corresponding to the thermoformable base layer of the claimed invention***), a metallic foil layer of aluminum (***corresponding to the barrier layer of the claimed invention***) and an innermost layer of a heat sealable polyolefin such as LLDPE (***corresponding to the laminate layer of the claimed invention***)

Art Unit: 1773

(Column 2, lines 12-55). Once the laminate material is formed, the containers may be folded and heat sealed (Column 3, lines 12-32). With regards to the process limitations of claim 8, the Examiner would like to remind the Applicants that the determination of patentability for product claims containing process limitations is based on the product itself and not on the method of production. If the product is the same or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process. *In re Thorpe*, 227 USPQ 964, 966 (Fed. Cir. 1985) and also see MPEP 2113. In this case, the product (i.e., the laminate) is the same despite the process limitations of heat-treating with moist heat at a pressure greater than atmospheric pressure. All limitations of the claimed invention are disclosed in the above reference.
